## PROJECTS

- Name: **Landlord Management System**

Descriptions: This project is developed using Java(JFrame & JDBC), Database PostgreSQL that maintains the land booking records.

Link: <https://github.com/GangurdeSujata/Landlord-Management-System>

- Name: **Password Generator**

Descriptions: This project is a Java Console Application to generate Random passwords and perform a password strength check. This is a minor feature that displays on the console hence information for the user about password security (Avoid using the same password twice/ Avoid character repetition, keyboard patterns, dictionary words, letters or number sequences, etc.)

Link: [https://github.com/GangurdeSujata/Password\\_Generator](https://github.com/GangurdeSujata/Password_Generator)

- Name: **Police File Handler System**

Description: FrontEnd : Java(swing and awt) and BackEnd: Mysql database  
This project was the Desktop application, used for Managing and maintaining FIR files, Criminal Details, Victim Details, Court Orders, and Staff Details. In this project, I used ireport -(jasper report plugins) to generate a report with a print. This project was developed using the NetBeans IDE.
